I dreamt last night I was the tear from your face
That fell upon the page
You wrote me yesterday telling me goodbye
And in my sleep I felt you near me
The first time I saw clearly
The pain behind your eyes

When the day is done
The moon bids well the sun
Starlights fill my eyes
Like hearts on Valentines
Lovers you and I forever in my dreams
Lovers we will be always in my dreams

The funny thing is that I loves you
And love is truly blind
I didn't realize love was so unkind
For they say only fools believe
In what they can not see
Sometimes it takes a heartache
To open up your eyes

When the day is done
The moon bids well the sun
Starlights fill my eyes
Like hearts on Valentines
Lovers you and I forever in my dreams
Lovers we will be always in my dreams

And though I know it's for the better
It's hard to say goodbye
Please hold me one more time
Only fools and kings make real their wildest dreams

When the day is done
The moon bids well the sun
Starlights fill my eyes
Like hearts on Valentines
Lovers you and I forever in my dreams
Lovers we will be always in my dreams
