In the dead of the night

What is it that you see?

In the dead of the night

In the dead of the night

Are you strong enough to sleep?

In the dead of the night

In the dead of the night

Caught out at a road block

In a ghost town

By a broken rock

Each faces the devil

Each way you turn

The streets crawl

And buildings burn

The sermon? is dry

Shoulder the plough

Bring it on home

It don't matter how

These hell hounds just a trick of the light

In the dead of the night

In the dead of the night

What are you going to do?

In the dead of the night

In the dead of the night

What's this world coming to?

In the dead of the night

As you twist and turn

Under a ball and chain

That came down once and will come again

You're at the mercy of the hour

That's sucking you dry

Better pray to the Lord

For a breath of life

And when the wind blows in

Burn the candle twice

Reach for the shield

And sharpen a knife

Cut fire and ice

With a kiss of life

In the dead of the night

In the dead of the night

Does it really have to be?

In the dead of the night

In the dead of the night

Who do you choose to believe?

In the dead of the night

Out on this wasteland  
Don't ? got no angels here  
For to bless this house  
Or break the seven seals  
Or hear the call of the West  
Or greet the fall of the East  
Or these rustling stones  
On this bed of disease  
Ain't no law ever been made  
That's going to settle the blame  
Go ahead and steal what is yours  
Everybody's doing the same  
On this runaway train  
Riding out of life  
In the dead of the night
