

## Shattered Reality

You want me to be there

You ask me if I'll care

But you see I was there

Only to find your empty stare

(Chorus)

As I stare into your eyes

Only to find another who was not real

Do you need me

Is your heart bare?

Really need me, now is that fair?

As you beg me to trust in you

But you see, dear, you were not you

(Chorus)

Will you feed me a nightmare

Please don't leave me, say you do care

'Cause I need you to be there

Really need you to be there for me

(Chorus)
