Once upon a time i rewrote the bible
try to find the words i didnt use
and again i see the answer in the video screen
mommy giggles as the baby screams
you might never know the question if you dont have an
answer
but what do you care you know it anyway
laying on my back looking for the shooting star
before i know it i'm shot thru the heart
i remember swimming thru the river of lethe
oh wait i forgot that wasn't me
i didnt even know he did it when she was gone
by the time it was over she never left anyway

i think i remember that thing i forgot
but i cant remember what i wanted to know
not that it matters the moments passed
thats ok i know it next time, forget the last

once upon a time i forgot the story
so i made something up as i went along
all i remembered was who it's about
were there 40 camels with whipped cream snouts?
question authority if they have an answer
but who the fuck are they anyway?
sleeping drinking coffee on interstate five
its not yet time so i stay alive
i remember peaking on the toilet in a dorm
oh damn how i wish that wasn't me
i watched the clock for a minute or two
does everybody kjow it goes in a circle cockwise???

i think i remembr thatthing i forgot
Lbut i cant remember what i wanted to know
not that it matters, the moments passed
thats okay i know it next time forget the last
...fin
