All I want is a summer night with you (3x)

All summer long I've been watching you
I seen you look my way
This can't be wrong cause I've seen you watch me to
The time has come for me to say
I wanna know where you learned to move your body
like that
And how can I get you to move it for me
Forget your man, he's miles away
Between the sheets is where we should be

Chorus:

All I want is a summer night with you
Believe me I understand
All I want is a summer night with you
I can't take the place of your man
All I want is a summer night with you
Its a temporary sensation
All I want is a summer night with you
I'm coming from the same situation

I don't want for us to fall in love
That only leads to heartbreak
Your the one that I've been dreaming of
How much more can a man take
I wanna kiss your lips
Your body next to mine
This is all about you and me
I'm gonna do you right
No woman looks so fine
Tonight your gonna come to me

Chorus (3x)
