Between You & Me.
How cautious we have become
Leaving it hooked & off the floor.
To think the better you
might have known... with age,

With every breath
you wake a picture instilled the way,
I wish you had lived with cause through pain,
No matter you died the same...
Machine

So tell me like you want to.
If you want me too,
(Here they come to rock your body all night) (2x)

When whos to blame,
In a matter of fact I might,
Purely suggest we tell the truth,
From here on out we walk the straight...afraid,

What will they do should we
weather this new reply?
Patiently wait your proper end,
From shameless motive to hollow sin,

So tell me like you want to.
If you want me too,
(Here they come to rock your body all night) (2x)

Cause I dont want you to come around here,
I just want you to go,
Cause I dont want you to come around here,
I just want you to know,

Is this the way you watch the body die?

I don't want your love before you rot.
