In the days when children sung,
In the heart claimed, shattered sun,
You were right in telling them.
Where they were beneath the snow.

Space call God right now,
Let them be judged upon,
Whatthey've done to him my son,
In the snow before the sun,

Please God right now,
Please God right now

If they could only say
all the things they saw, would they?
They were only boys,
With time I create,
invest - investigate
puzzle solved belated.

Which one killed my boy?
My question to the incriminating convoy,
I want death & blood for my sons,
In the curse that warms the sun.

Please God right now,
Please God right now

If they could only say
all the things they saw, would they?
They were only boys,
With time I create,
invest - investigate
puzzle solved belated.
