And it was close
And I was strung out far
My painful burdens they will leave a scar.
And I took a breath
And I clenched my fist
And I drew the knife that would slit my wrist.
ooooh... (x3)
chorus
And I got no more pains.
And I got no more fears.
And I got no more worries.
And I got no more tears.
Blood was warm
And it dripped on my bed
My body relaxed as I lowered my head
Conscience was faded
But I managed a smile
For I knew that I'd be gone after a while
ooooh...(x3)
chorus
And I go from the pains.
And I go from the fears.
And I go from the worries.
And i go from the tears.
bridge
Now i'm drifting along.
In a sea of black i'm gone forever.
I never took her back.
