She's always in control  
My beating heart she stole  
I'm almost done with this  
Can't take it no, no, no  
She used to get me  
But then lately it's been opposite of that  
I'm going crazy and I want out of this mess  
Step up to the plate like that

Swing, miss and you strikeout like that  
You had your chance I'm not taking you back  
When I leave I'm not looking back  
You had your chance I'm not taking you back

We were like Jack and Rose  
The credits start to roll  
I thought I knew it all  
But no, no, no, no  
I used to play the fool  
But now I see the consequence of that  
I'm going crazy and you know I fight back

All this time I've been so blind with you  
I should have seen it coming all along  
This is goodbye our love capsized  
Somehow I feel the weights just slip away  
I'm breaking out, I'm breaking out
