Your love has got me swerving, swerving, hey
Your love has got me swerving, swerving, hey
Your love has got me swerving, swerving, hey
Your love has got me, hey, swerving

Never seen it coming, now she caught me in a blind
spot
Came along for the ride and opened up my heart baby
I never planned this, ever happening, baby never again
Should I have my heart and ... I knew that this would go
bad
...wanted, now we was going bad
But I had to control the crash
Don't ever move too fast, cause you just might crash

I don't answer my phone, girl don't call me no more
Cause it's hard to be, you were my everything
These thoughts in my head, and I'm close to the edge
Staring out of the window, head in my hand
Thinking how could this be, with somebody I knew, try
to betray me
With somebody I knew, ... call me
But you didn't win just my heart feels lazy

Never seen it coming, now she caught me in a blind
spot
Came along for the ride and opened up my heart baby
I never planned this, ever happening, baby never again
Should I have my heart and ... I knew that this would go
bad
...wanted, now we was going bad
But I had to control the crash
Don't ever move too fast, cause you just might crash

Girl you played with my mind, wish that I could rewind
And undo all the things that took off my time
No more you and I, cause I gotta get me right
And I'm tripping over you with my boy
Thinking how could this be, with somebody I knew, try
to betray me
With somebody I knew, ... call me

But you didn't win just my heart feels lazy

Never seen it coming, now she caught me in a blind spot

Came along for the ride and opened up my heart baby
I never planned this, ever happening, baby never again
Should I have my heart and ... I knew that this would go bad

...wanted, now we was going bad

But I had to control the crash

Don't ever move too fast, cause you just might crash

Somebody take away her ride, her ride tonight

Cause baby you...gotta be the one to do you right

And I promised my soul, ... get into what you do,

That's what you do girl do what you do...

Man this just crazy like, you know what I'm going through

But on the flip side, man I ain't even...

Never seen it coming, now she caught me in a blind spot

Came along for the ride and opened up my heart baby
I never planned this, ever happening, baby never again
Should I have my heart and ... I knew that this would go bad

...wanted, now we was going bad

But I had to control the crash

Don't ever move too fast, cause you just might crash.
