Assimilate

How do we rate forgiveness end the inflection i hear
transparent sounds and noises uncertain are
Still requesting time is worth waiting when much more
can be done let slide our lucid side fill us to
Limitation ratify what's real and why despite our
common
sense you guide us in to the darkest
Corners knowing the answer pushes us in the opposite
direction to falsify the way we think with our
Decisions when who we really are is exposed openly
we can't forfeit real expression so deliver us
From evil.

Thanks to razvan
