Till there was you
What can I do?
Till there was you
What can I do?

What in the world is a girl to do
When in this smokey place I only see you
Was far away when you caught my eye
You've brought me back and now you're making me
high

I was alone out there with no one else around
Now I've fallen for you and there's no coming down

(Till there was you)
I know what you're needing
My thoughts are leading, me straight into your eyes
(What can I do?)
I'm looking right at you
This feeling is all new, I want you addicted to me

(Till there was you)
I know what you're needing
My thoughts are leading, me straight into your eyes
(What can I do?)
I'm looking right at you
This feeling is all new, I want you addicted to me

Fate can act in a curious way
When all that mattered means nothing today
All that concerns me, that drenches my thoughts
Is the sensation that seeing you brought

I was alone out there with no one else around
Now I've fallen for you and there's no coming down

(Till there was you)
I know what you're needing
My thoughts are leading, me straight into your eyes
(What can I do?)
I'm looking right at you

This feeling is all new, I want you addicted to me

(Till there was you)

I know what you're needing

My thoughts are leading, me straight into your eyes

(What can I do?)

I'm looking right at you

This feeling is all new, I want you addicted to me

I want you addicted to me

I was alone out there with no one else around

Now I've fallen for you and there's no coming down

(Till there was you)

I know what you're needing

My thoughts are leading, me straight into your eyes

(What can I do?)

I'm looking right at you

This feeling is all new, I want you addicted to me

(Till there was you)

I know what you're needing

My thoughts are leading, me straight into your eyes

(What can I do?)

I'm looking right at you

This feeling is all new, I want you addicted to me

(Till there was you)

I know what you're needing

My thoughts are leading, me straight into your eyes

(What can I do?)

I'm looking right at you

This feeling is all new, I want you addicted to me

I want you addicted to me

I want you addicted to me
