"Two Occasions"

Visit "[Two Occasions](#)" on MotoLyrics.com

'Cause every time I close my eyes I think of you
No matter what the season is
I still love you with all my heart
I wanna be with you forever, wherever you are

Hey baby, easy, so real
Just for you, because I love you

A summer love is easy but it's just not enough
To satisfy emotions that are shared between us
A winter love is cozy but I need more
It just intensifies my want to have a love that endures

'Cause every time I close my eyes I think of you
No matter what the season is
I still love you with all my heart
I wanna be with you wherever you are

I only think of you on two occasions
That's day and night
I'd go for broke if I could be with you
Only you can make it right, only you

An autumn love is special at this time of the year
But when the leaves are gone does that love disappear
I never underestimate the new love of spring
But I'm glad to say in my heart, my love's lasting

'Cause every time I close my eyes I think of you baby
No matter what the season is
I still love you with all my heart
I wanna be with you wherever, wherever you are

I only think of you on two occasions
That's day and night, night and day
I'd go for broke if I could be with you
Only you can make it right

I only think of you on two occasions
That's day and night, night and day
I'd go for broke if I could be with you

Only you can make it right so, make it right

'Cause every time I close my eyes I think of you
No matter what the season is
I still love you with all my heart
I wanna be with you forever, let's stay together

'Cause no matter what I do baby
I only think of you on two occasions
That's day and night and again night and day
I'd go for broke if I could be with you girl
Only you can make it right

Girl I, I only think of you each and every day
And I see I'm in love
If I could be with you girl
Only you can make it right
No matter what I do

Girl I only think of you on two occasions
Do you think of me?
I'd go for broke if I could be with you
Only you can make it right
