Ice Caps I look for you.  
Ice Caps are we through?  
There's less of you,  
But there's more at the bottom of the ocean floor.

Northern lights. Will you stay  
To hold the north while the ice melts away?  
Can you feel past this great change  
Thousands of years melt away.

Northern lights. Cosmic rain  
Midnight sun will you stay?  
Can you feel past this great change  
Thousands of years melt away.  
Can you feel past this great change  
Your lover the ice becomes a stranger again.  
Your lover the ice becomes a stranger again.
