I was cold like the city I grew up in.  
I did wrong in the name of being messed up and  
I lit the whole truck on fire  
Cause I was scared of where we were going.

When I said there was and end to love.  
When I said there was and end to love.  
When I said there was and end to love.  
I was lying.

On that night after the parade  
You found me alone cursing and swaying.  
You pulled me into a cab  
And chased my nightmares away.

But when I said there was and end to love.  
When I said there was and end to love.  
When I said there was and end to love.  
I was lying.

Last time we talked the damage was done.  
I called you up because I was scared to walk alone.  
I thought I had forever  
To repair what I had done.

But when I said there was and end to love.  
When I said there was and end to love.  
When I said there was and end to love.  
I was lying.

When I said there was and end to love.  
When I said there was and end to love.  
When I said there was and end to love.  
I was lying.

I was cold like the city I grew up in.  
I did wrong in the name of being messed up and  
I lit the whole truck on fire  
Cause I was scared of where we were going.
