maybe i just want to be your friend.  
why does something this good have to end?  
take some time your fear will go away.  
i dont have to live my life this way

this love is all youll need  
you know its on your side  
just tell me that youll want me always  
i promise i will try.

you tell me that you feel tension here.  
maybe youre just always running scared.  
from those things that you would call your own.  
when your life is over then you'll know.

this love is all youll need  
you know its on your side  
just tell me that youll want me always  
i promise i will try.

come on and do it all again.

now your time is ending and youll know  
when your life is burning much too slow  
its so easy for you just to say  
one more thing may set you the wrong way

yeah
