A knuckle duster is the most deadly in the ponderous
pace
Of floating justice single-handed dynamo
Take it now, say the way we want and not for you to
point the finger
Combustible in a word fuckin', say the word and you'll
be free

Continue your journey Superman say I am we can put
you down
Not a wizard-boy question just a demonstration of
definition
Silver city crusading to the top of a fug'n bone break
most
Vile experiment ready to eat your ass

Clockface, bigtime
We are some kind
Say it like always
Sound, silence promote the zero

A steel hammer game from me to you but I don't mind
the matter
Ratmouth don't know what you need just know what you
want
'Walking dead' crawling bloodthirsty Hollywood demon
flower grow in the
Valley of Love like a freak highway accident

Last ride rolling down say hi-density
Glory stomp gonna make the girl in the room
In the house turn and see that I ain't there
