# "End Of Your World"

Visit "[End Of Your World](#)" on [MotoLyrics.com](https://MotoLyrics.com)

The light from the street  
it comes filtering through your room  
Just another night just another dream  
you're putting yourself into  
And outside the streets are bare  
without a care as if no-one cares  
to make a sound  
i said well ain't that the way you like it  
Well i know with all the plans we had  
it was gonna be hard to succeed  
But harder than any of that  
is sitting here watching you bleed  
You're on a plane to the end of your world  
You're going down and down  
It's one hell of a way to go out  
Yeah and all around it's comin' down  
You feel your winter it's setting in  
The leaves they now fill the gutters  
the trees just branches in the ground  
And into an empty room my eyes are open wide  
to try and find something that was inside  
to take the place of what was left behind  
Well you know it's so quiet here  
It's like a country town  
Where all the drama's gone  
It's left far behind  
and now there's only one peace of mind  
You never thought it was a crime  
to be so sad and lonely  
You're going down and down  
It's one hell of a way to go out  
Out with a bang
