

## Arch Enemy "Black Earth"

Visit "[Black Earth](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Across the lake of fire through the desserts of decay  
The flames are burning higher  
In this land of death you're easy prey

Black earth  
Save our souls  
Black earth  
Save our souls

Looking back in anger at the twentieth century  
Tormented we surrender in artificial serenity

Twisted, torn and burnt violation of the crust  
Man got what man deserved  
Turned the future into dust

Black earth  
Save our souls  
Black earth  
Save our souls

A millenarian failure the dark age has returned  
Waiting for a miracle to save the common herd

In a century of darkness the horror spreads within  
As our planet stops to turn all hope is lost for man

Black earth  
Save our souls  
Black earth  
Save our souls
