your hate is our trigger
revolution now

the more we have to suffer
the more we will fight

with our fist up in the air

legions marching-ready to fire
the streets will burn-let the black flag rise
legions marching -ready to fight
empire ofcorruption- crash and fall

under black flag we march

The voice of rebellion , call your name
servants of the truth, are standing tall

with our fist up in the air

legions marching-ready to fire
the streets will burn-let the black flag rise
legions marching -ready to fight
empire ofcorruption- crash and fall

legions marching-ready to fire
the streets will burn-let the black flag rise
legions marching -ready to fight
empire ofcorruption- crash and fall
