Where are you going?
Can I come with you?
I don't feel right when you're not here

Where are you going?
Can I come with you?
I just don't feel right when you're not here

You know that's why I like you
That's why I like you

Where are you going?
Can I come with you?
I don't feel right when you're not here

Where are you going?
Can I come with you?
I just don't feel right when you're not here

You know that's why I like you
That's why I like you
