We were close felt special  
She was telling me she's ready to settle  
I settle for the same way too  
Went to me or the same day too  
It's not easy fang in the rang one  
Then messing it up like I've done  
That's wasting time I can't take it  
Come on make a promise then sure he'll break it  
She began to feel quite sad  
I began to feel quite mad  
'Cause it burns me to know I might not change  
Got too many women on the brain  
I'm going insane, got slowed down  
Let a flag and I don't wanna slow it down  
If I do it anymore I be feeling the pain  
It's not who I want so I got I got away  
And away I'm staying, nobody likes to be alone  
I might be all full night on the phone  
And this girl's telling me how she wanna come and  
see right down in my zone  
The one I find is cold  
Icy blue eyes, rest in face  
We got no time so we can have fun every night that's  
right  
She wants none of those, I want chinese  
I'm a capricorn she is a piesces  
We used to go with the side side 10  
We had a really nice drink with fly chins  
The night brief, I feel lively  
He wants to be with Kylie  
We like to spend time on a friday  
Anytime you wanna see me deep down  
Drank too much wine and the shoe space I'm lacking  
Some people throwin us to have a good time  
Baby that's what we're having  
Whether we like it or not we are bounded  
Whether we're excited or not  
We might be meant for each other  
Whether we fight it or not  
Lately I've been a bit all in my A game  
In the street though I don't play games astral

See her 2 times in 8 days,  
And I might not see her in another 8 days  
'Cause I wanna find these  
Find these fine when I'm looking  
She knows I shared a cake I'm cooking  
It's all me and her  
Nobody else gonna get a looking  
My time is ready for new ways  
I was on one song steady for 2 days  
I got countless fires to the haze  
Check the radio when I get plays  
Man I get praise and well deserved  
Energy was too well preserved  
And I told my mama do well for her  
I feel life dragged her through life she's her  
Still I and the world is a must  
No trust and I gotta flame us  
When it's all telling dust that is dust  
And we can't live from a crust with a crust  
We decided not to, 'cause the hard work this is where  
we got to  
If you really wanna win nobody can stop you  
When you can achieve my english on queue  
Oh run away stump like samples  
Set examples I'm building castles  
And I got a brother in law passing fossils  
Close fam I love I got heartfelt  
No doubt I'm gonna break the cycle  
Smile on her face the heatwave the life full  
Catch them easy hooks they recycle  
BB care team we're vital  
We're vital, we're vital  
BB care team we're vital
