You just can't smile it away
It's much more than passion
Oh, it's love and I've heard some people say
They've seen love move mountains

You just can't laugh it away
It's too deep inside your feelings
Oh, it's love, not just some game you can play
Before I left and go on your way

Let's sit and talk it over
And work things out, I love you so
Can't we just talk it over
And see what we can do, uh baby

You just can't pass it away
Like some silly fashion
Oh, it's love and love comes eager to stay
It just won't leave you that way

Let's sit and talk it over
And work things out, I love you so
Can't we just talk it over
And see what we can do, uh baby

Let's sit and talk it over
And work things out, I love you so
Can't we just talk it over
And see what we can do, uh baby

You just can't pass it away
Like some silly fashion
Oh, it's love and I've heard some people say
They've seen love move mountains
Oh, it's love and I've heard some people say
They've seen love move mountains
Oh, it's love and I've heard some people say
They've seen love move mountains
