Box springs are stained with yellow pillows  
Held our heads down  
Holding the rain outside on the curb  
Where I wasted half of your life  
Both of our lives

Everything's closer to the end but  
I will get farther from you  
Everything's closer, it's the end but  
I will get further from you

Your eyes are blue  
But I can't see that color hue  
It's been so dang long  
God, I was wrong

I'm dead to you, you say we are friends but  
What is a friend when there is a man who  
Sleeps in your bed too

Everything's closer to the end but  
I will get farther from you  
Everything's closer, it's the end but  
I will get further from you

I was wrong, I was wrong  
I was wrong, I was wrong

Everything's closer to the end but  
I will get farther from you  
I will get farther from you  
I will get farther from you  
I will get farther form you  
I will get farther from you
