Words and Music

It's just You and I, and the Moon and the Stars in the sky,

We'll soon fade out of sight, and just call it a night, and good-bye.

If I had my way, If I could think of all the right things to say,

To a woman so beautiful, I really wantcha to fly with me,

Chorus Into the blue

That's where I want to take you to.

Holding you tight,

Wanna stay up all night,

Mamma, tell me you do.

Into the Blue,

Im sure that's where all dreams come true

I know it's alright,

Cuz I think that I might

Just be falling for you.

What's that I hear? Is that a Nightbird warning us morning is near?

Or Is the song he sings only for someone he's lonley for?

If I had my way, If I could think of all the right things to say,

To a woman so beautiful, I really do wantcha to fly with me,

Chorus
