

William Tell "Sounds"

Visit "[Sounds](#)" on MotoLyrics.com

Take a breather, let your air out
This can get you somewhere
She's the queen of screaming shit out
If she lets you stand there

You keep ringing in my head
You always do this to me
You keep ringing in my head

Whatever happened to your song?
It's just how the radio sounds
We used to stay out all night long
Living on radio sound

You are thinking you know what's right
Nothing you can't see through
Stand and shiver, turn off your lights
And tell me no one's changed you

You keep ringing in my head
You always do this to me
You keep ringing in my head

Whatever happened to your song?
It's just how the radio sounds
We used to stay out all night long
Living on radio

You keep ringing, ringing
Ringing, ringing

Whatever happened to your song?
It's just how the radio sounds
We used to stay out all night long
Living on radio

Whatever happened to your song?
It's just how the radio sounds
We used to stay out all night long
Living on radio sound
