"Straight In The Eyes"

Tonight, you're here and nowhere else
Right here in front of me, a few steps away
You say you're not religious
I don't have any religion

You do lead
My every move
My most beautiful dream
A light coming out a dark hallway

A simple look
Echoes the universe
You are this universe

Straight in the eyes x 4
An instant, A living dream

My life ravel's in front of my eyes
All these images wandered x 3
Wandered

I wanted to thank you without crying
I wanted to say I love you without screaming
X 3

Tonight, you're here and nowhere else

I wanted to thank you without crying
I wanted to say I love you without screaming
X2

I just promised you never to give up
never to give up x3
