"Lonesome Trail"

Visit "[Lonesome Trail](#)" on MotoLyrics.com

Riding the wind
We drift along
Moving across the desert land

Into the night
Shadows dissolve
Nomads wandering through the

Sands of space and time
The spirit of adventure
Raised within our hearts

The time is now
The time has come
To journey farther from the sun

Let's not hold back
We've just begun
To understand our destiny

We can carry on forever
Driven by the spirit in our hearts

Leaving the world behind
We travel on through silence
With only the stars to guide us
Along the lonesome trail

Never to return

One million miles of silence
With only the stars to guide us
Along the lonesome trail
The lonesome trail

For distant lands
We set our course
To sail across the ocean

We've come so far
We can't turn back

It's a test of our devotion

As we race into the future
Expectations grow within our hearts

We rode the storm
We've braved the seas
This passes from our history

Into the skies
The great beyond
To reach escape velocity

We can carry on forever
Driven by the hope within our hearts

Leaving the world behind
We travel on through silence
With only the stars to guide us
Along the lonesome trail
Never to return

One million miles of silence
With only the stars to guide us
Along the lonesome trail
The lonesome trail

We can carry on forever
Share the universe together

Is this the life that we chose for ourselves
Travel along the lonesome trail

The lonesome trail
The lonesome trail

Leaving the world behind
We travel on through silence
With only the stars to guide us
Along the lonesome trail
The lonesome trail
The lonesome trail

The lonesome trail
The lonesome trail

With only the stars to guide us
Along the lonesome trail
The lonesome trail
