Well things are hard this time you know
This time we're better off alone
That's what she said

When things are said and done
We'll wait here still 18 and in love
That's what I said

The truth will bring us down
And we're headed for the ground

You'll go and I'll follow
We'll dwell on tomorrow
We'll sink in our sorrow
This is what we get for being honest

Head on my chest, back to the ground
Let's find a way out of our town
You know we're in this together

A shoreline destroyed by the waves
Unspoken words, red letter days
So here's hoping for better

Pre Chorus

Chorus (x4)

This is what we get for being honest
