"I Know What You Did"

Visit "[I Know What You Did](#)" on MotoLyrics.com

Oh you're such a clever one
With your eyes so bright
A smile so wide
Guess you thought you had me
Wrapped around your finger
Well I've come undone
I gotta hand it to you
You're really playing at the top of your game
But I can play too
And I'm on to you

I know what you did
When you left last night
You were out of sight
I know where you've been
Where you laugh it off
And say that it's all in my mind

Can't you see it's written all over your face
You're tangled up in every lie you've told
You made me believe
That I'd lost my sanity
But I'm no fool
I'm out to prove
I'm through with you

I know what you did
When you left last night
You were out of sight
I know where you've been
Where you laugh it off
And say that it's all in my mind

I know what you did
When you left last night
You were out of sight
I know where you've been
Where you laugh it off
And say that it's all in my mind

It's all in my mind

I'm no fool
I'm out to prove

I know what you did
When you left last night
You were out of sight
I know where you've been
Where you laugh it off
And say that it's all in my mind

I know what you did
When you left last night
You were out of sight
I know where you've been
Where you laugh it off
And say that it's all in my mind
