"Real Love"

Visit "[Real Love](#)" on MotoLyrics.com

Spoken:

There will never be another love for you and me

Chorus:

Real love where do you come from

Real love lead the way

Real love where do you come from

Real love stay with me

Stay with me

I need you baby like the birds need to sing

I want you always, I cherish everything

You do for me, babe you set me free

It's you and me, for eternity

Chorus

When your arms surround me

And you smother me in your sweet love

We let tender kisses loose on one another

We're not living in the shadow of someone we could be

There's no pretending, when we're together all there is

Is honesty, babe you set me free

It's you and me, for eternity

Chorus

I need you baby and I know you need me too

We were meant to be together

There's something special in the

Things that we do, it's me and you

We're stuck like glue, 'cos this love is true

Chorus
