I won't survive this way  
Your shadows darken my day  
I see you when I turn away  
You're haunting me in every way

Stand up face the ghost inside  
Reach out there's nothing more to hide  
Take aim at what you can't divide  
Haunting you through and through

Tossing turning losing sleep  
Will you ever let me be?  
Can you let go of your destiny  
Break the chains and set it free?

Stand up face the ghost inside  
Reach out there's nothing more to hide  
Take aim at what you can't divide  
Haunting you through and through

Can you breathe  
Can you believe  
Make it through the night

Stand up face the ghost inside  
Reach out there's nothing more to hide  
Take aim at what you can't divide  
Haunting you through and through  
Haunting you haunting you
