1st verse:

SHE's in a pile of old photographs
with her smile its one thing I liked the best
I ask myself will it ever be the same,
cause now she answer to another man's name
as the feeling passes,I know im doin well
but then her memory catches me with the pain of all
i've felt

chorus:

But then I see them and Im barely breathin
I reach out my hand ,but there's nothing I can do
I wanna hold her ,and cry on her shoulder
but I know she's gone with everything we knew

2nd verse:

Ive sat here too long with this glass and cigarette
with each one gone brings on more regret
tryin to find my way through the smoke and the tears
trying to replace her, and cover up my fears
But I know she's moved on and she's doin good
I know he'll be there to love her like I should of.

chorus:

But then I see them and Im barely breathin
I reach out my hand ,but there's nothing I can do
I wanna hold her ,and cry on her shoulder
but I know she's gone with everything we knew..

bridge:

Now what Im thinkin might not be right
but I cant fight the way , that I feel tonight

But then I see them and Im barely breathin
I reach out my hand ,but there's nothing I can do
I wanna hold her ,and cry on her shoulder
but I know she's gone with everything we knew..

With everything we knew....
