"Over You"

Visit "[Over You](#)" on MotoLyrics.com

over, over over im really really over you
over, over over im really really over you

text me on my phone coz your hinting your alone
waiting for me to react and beg you to come home
but im over the moon no im actually over you
reading and to delete was easier than i thought

handle the fact that you make me wanna sing
you make me wanna dance get out and do my thing
you make me see without you im a queen
and im on such a high cause i finally realised that im

over you, over you, over you
im on such a high
cause i finally realised that im
over
im really really over you
over
im really really over you
over
im really really over you
over
im really really over you

i feel like a winner because i got this in the bag
yeah really did hurt me but now i sing like mad
i'm glad that you left cause i knew you want me back
now have a taste of your own cry
can you handle that

handle the fact that you make me wanna sing
you make me wanna dance get out and do my thing
you make me see without you im a queen
and im on such a high cause i finally realised that im

over you, over you, over you
im on such a high
cause i finally realised that im
over
im really really over you

over
im really really over you
over
im really really over you
over
im really really over you

over you, over you
over you, over you
im on such a high
cause i finally realised that im
over
im really really over you
over
im really really over you
over
im really really over you
over
im really really over you
