Steromud
"Pain"

With every fall you come,
you surprise me, hypnotize me
With every breath I take,
you deprive me, suffocating, choking

Now the time has come when I tell myself
there's nothing more I can take,
then you show me
Will it matter right now,
if I'm already known
Thats what you do to control me

So much sadness from me,
thats the way I feel
All the madness from me,
thats what makes you real
I don't want your pain

With every cut you make,
you expose me, 'cause you know me
With every bottle drink,
you can drownd me, 'caus you fond me out

Now the time has come when I tell myself
there's nothing more I can take
then you show me
Will it matter right now
if I'm already known
Thats what you do to control me

So much sadness from me,
thats the way I feel
All the madness from me,
thats what makes you real
I don't want your pain

With every fall you take
With cut you make
So much pain

So much sadness from me,

thats the way I feel
All the madness from me,
thats what makes you real
I don't want your pain

So much sadness
So much sadness
Pain
