I've got an ongoing problem in my life
To tolerate some people about
No matter how I try playing the nice guy
There's always some picking you out
Just the other night my friend was walking home
About his business gentlemanly
Then a bottle broke and the lights went out
And he spent the night in A&E

Where do you run off to when everyday people find it
harder to sleep?
And while you pull on through
They'll just run away from the world cause they're weak
Narrow minded social club
Narrow minded social club
At the narrow minded social club
Narrow minded social club

How we gonna carry on like this
Watching your back whenever you leave your house
'Cause one day when I have my kids
I'd hate to have have a fear of letting 'em out
Cause just the other day on the News at 9
A young boy made his way home
They came up from behind and didn't hesitate
And now he's front page of The Sun

Where do you run off to when everyday people find it
harder to sleep?
And while you pull on through
They'll just run away from the world cause they're weak
Narrow minded social club
Narrow minded social club
At the narrow minded social club
Narrow minded social club

I've got an ongoing problem in my life
