Step outside
My feet meet the pavement
And i'm alright la da da da

I drive up and i see her outside
Honey please come back to me just one time

So what, are you doing here
You know exactly what i'm doing here
Just let this go
I can't let go

And she's got me screaming
At night when i'm dreaming
He's got me thinking
I'm not good for anything

Look at this mess we've made
With only our selves to blame

I know all about your midnight mistakes
But I play dumb because the truth I can't face

And I know about all your mistakes
Like all of the guys you were with on spring break

Come on just stop i'm so sick of fighting
And i look fine now but inside i'm just dying
Just let this go
I can't let go

And she's got me screaming
At night when i'm dreaming
He's got me thinking
I'm not good for anything
