

## Stina

### "Little Star"

Visit "[Little Star](#)" on MotoLyrics.com

Little star  
So you had to go  
You must have wanted him to know  
You must have wanted the world to know  
Poor little thing  
And now, they know

Little star  
I had to close my eyes  
There was a fire at the warehouse  
They're always waiting for a thing like this  
Came travelin' from all the town  
For you, little star

Little star  
So you had to go  
You must have wanted him to know  
You must have wanted the world to know  
Poor little thing  
And now, they know

[what the hell is this??!!]

For you, little star
