Haven't You ever come back to me, the last time I saw
you
Forget everything I said
Hoped that you would never ask for me, but you did it
anyway
Your days have fallen fast

Chorus:

And the way they looked at me when I was standing in
the rain Their feelings almost gone
And the way they stood staring at the sky, the stars
begin shine at the heartbeat of our Faith
When they've fallen for you
You can feel the way they do
Then their lives begin to shine
Like nothing ever seen before

I wanted it for both us they know, did you ever tell
I'll forget everything you said
The One day I tried to free you, they held me back
The words have fallen fast

When they've fallen for you
You can feel the way they do
Then their lives begin to shine
Like nothing ever seen before

And the way they looked at me when I was standing in
the rain Their feelings almost gone
And the way they stood staring at the sky, the stars
begin shine at the heartbeat of our Faith
When they've fallen for you
You can feel the way they do
Then their lives begin to shine
Like nothing ever seen before

And the way they looked at me when I was standing in
the rain Their feelings almost gone
