

Within Temptation "Candles"

Visit "[Candles](#)" on MotoLyrics.com

Take away
These hands of darkness
Reaching for my soul
Now, the cold wind,
Blows out my candles
Feeling,
Only fear,
Without any hope
A thousand dark moons
A thousand winters long
A million fallen stars,
The candle burns in the womb
We tried not to forget,

They live through us
Slowly they die away at every candle's end
A thousand dark moons
A thousand winters long
A million fallen stars,
The candle burns in the womb
We tried not to forget
They live through us
Slowly they die away at every candle's end
