just let the cold air cool you.
let your feelings turn to waste.

lets clear our minds.
collect your thoughts and open your eyes.

let me expose you wipe your damages away
lets smooth this plaster try our best to leave this place.
well try your best to leave this place.
we'll try to clear this slate again.

for you to find your way for you to forget the pain.
ill stay up all damn night and hold my breath to set you
free.
under the stars. we watched the snowflakes.

lets keep this strong.
so they'll never stop us.

so they'll never stop us.

you'll never stop us.
