"You Are All My Own Invention"

Visit "[You Are All My Own Invention](#)" on MotoLyrics.com

Night sky looking down, it's my own
Feel free to fly a plane but it's my own
Scratch a symbol in the dirt for the earth and the sea
Saying you can't hurt the night sky
No, you can't hurt the night sky, that won't hurt me

I'll take a walk to clear my head
'Cos some things are better not said
But taken apart from the inside instead of the out

You are all my own
You are all my own invention

Nothing to do with an afternoon in my home
Any place with a space to breath and it's my home
Every shape and every color, how I want it to be
Living off the same heartbeat
Living off the same heartbeat as me

I'll take a walk to clear my head
'Cos some things are better not said
But taken apart from the inside instead of the out

You are all my own
You are all my own

But I don't need expert opinions
I don't need signs of the times
And when I'm left to myself
All those things are left behind

I'll take a walk to clear my head
'Cos some things are better not said
But taken apart from the inside instead of the out

You are all my own
You are all my own
You are all my own
You are all my own invention
