Don't like to die so far away from home, he said
don't like to die when I'll be all alone
So I took him to the place where he came from
and waited for his end to come

I like to help my friends to go away
I like to help my friends to die

Don't like to die feeling
that struggle and pain, she said
don't like to die slowly going insane
So I gave her the final drink of joy
and puted in her arms her favourite toy

I like to help my friends to go away
I like to help my friends to die

I saw him lying in his burning car
I heard him screaming but help was far
So I walked through the fire and held his hand
together we waited for the end
