Friend you're bringing me down  
Friend there's so much around  
Try communicating  
Don't anticipate  
Cos I want to run with you  
Cos I want to run with you  
Cos I want to run with you  
And maybe then we can walk together

Friend you're getting paranoid  
Friend you're becoming soul destroyed  
They all laugh at you  
They're all dismissing you  
And I want to run with you  
And I want to run with you  
And I want to run with you  
And maybe then we can walk together

Cos I want to see you in no pain this time  
Cos I want to see you shine  
Blind me, blind me, blind me  
Cos I wanna run with you  
Cos I wanna run with you  
Cos I wanna run with you  
Maybe then we can walk together  
Together  
Together  
Together  
Together

I'm coming to drag you out  
To drag you out  
And we can walk together  
And we can walk together  
And we can walk together  
Together  
Together
