"Thought Conditioning"

Visit "[Thought Conditioning](#)" on MotoLyrics.com

Your misguided mind seeks presence of a greater,
from around the equator, as we move via soul, via
sound, surrounds all verbalization nation never will it
be, like the same way again, so they blend human
nature in the excess, less you know the whole
combination of a paragraphs genetic complex, many
pages in the book, through the ages, take a look out of
a room with a dark view, view a time I never knew and
I'm never gonna be without drive on the highways
taken, making every move, with a brain swift and
nimble as a being I resemble my god, it's hard and I
recognize and deliver from the me to me, seem to be,
high society, are down low, showing all out, out of body
experience, looking at your own reflection, correct
mind thought conditioning.

Cast a revelation for the time of day, eventual panic
attacks me, but I come back with a new determination,
knock wood, street solid rock, clock tick a time, are you
inclined to be the anonymous, I'm ever living like
Israelite, those who funk faking, we're breaking now
that were taking it out of sight, like a spark, dynamite
ignite, light a flame fire burn, live and learn, no cause
for your concern, never antagonize me, fear is not
always overcome, some thrive on this, live on this
stratosphere, we near a new day, fear inside us all you
know you can't deny it, I, keep on stepping use minds,
lethal weapon, it's time being taken, history is in the
making, by the day, hold a thought for the ones that
slept but to me dignity was like kept, we're in the line of
fire, I will not break or take your petty excuse for the
lack of punctuation, natures on the down slope, still I
stand vertical position three ways, intuition over paths
of belief, I keep it brief and let your own interpretation
know the real meaning of my alternative, it wrecks
typical, from the back I will speech my peace, my
release will let the hard times cease.
