V1 [PACK FM]

First we got Kevin, thirsty, hot and sweating in the
kitchen with no shirt

Computer shutdown before he got to save his
homework

Now he's really heated, blood boiling heart racing
Looks around "Where's Traci?" I told her not to use the
A/C

She must've caused a power outage, screams out the
window to his sister

In the knick of time, a speeding care barely missed her
Black Lex screeching to a halt in the intersection

Collided with the ambulance going down the street in
the wrong direction

Driver jumps out of his car, left the engine running
High tails it up the block, screaming at the top of his
lungs

"Don't Worry, Momma! I'm Coming!"

Crowd starts to gather, cops make it to the scene
Paramedics in the ambulance trying to save a patient
But it doesn't look like the driver's even gonna make it
He's hemorrhaging from the neck, nothing they can do
to stop it

Then a shot fires from the crowd. "Get your hand outta
my pocket!"

HOOK

Mind open, eyes wide

Try and focus follow the signs

Mind open, eyes wide

Try and focus follow the signs

'Cause you never know if today is the day

Better be sure that you mean what you say

And keep your mind open eyes wide

Gotta focus follow the signs (Come On)

V2 [TonedeFF]

"I don't wanna die like this", he keeps thinking

Repeatedly, blinking, as his eyes are stinging from the
bleeding

People screaming on the scene, he breathes the steam

in

He believes he's dreaming, even he sees Freeman, his
team leader, he covered for this evening

He pulled the favor, but never asked for a reason

Gasping and wheezing, too late to scream at dispatch
with his grievance

He's trapped with the wheel in abdomen, feeling is
passing...it leaves him

Deceased in flash, and the screams come

Accidents happen, man, the summer's a hazardous
season

The camera pans to man with a clean gun

And it gleams sun, when he moves to reach up
to squeeze slugs right into the chest of a typical street
thug

He screams police, and people freeze up

Now introducing Dee, he ducks and the cop thinks that
he sees something

And he bucks, and now the brother needs to be
cleaned up

And now we cut to a girl with D-cups

Holding a pair of green chucks, and a tee covered in
Dee's blood, who really seems crushed

Now, she weeps but seems touched

In an weird way, like crying on the outside but inside
she's thanking Jesus

She leaves us, as she's being hugged

By a man resembling the cat the paramedic thought he
might have ID'd or dreamed of

As the camera swings up, we see Kevin, and he's
rushed

To make it to class, He thinks "And of all days to be
stuck"

He busted his ass, for three weeks on his thesis to
impress Professor Greenlove

Who doubts that he'll pass, teetering on a D+ plus

He got be up at the School of Electrical Engineering at
3 cause

If he don't, well, then he's fucked, with loans and no
degrees to speak of

We pan back to the rear of the ambulance, the second
medic administers treatment

On a old woman, who's spleen's ruptured from deep
cuts

She's really in need of, a heart surgeon, Well, yeah this
part's disturbing

Cause the medic dips and leaves the lady with debris
stuck

In her veins, Gee shucks, that's deranged, Kevorkian
steeze

And according to me, there's more to this here than it

reads cause

HOOK

Seemed like one of those days when nothing was clear
Plus the temp's 10 degrees above a hundred out here
(Flashback) phone rings Traci rushes to pick it up
Worried look on her face. Arm hairs sticking up
"Don't tell me on the phone" "OK well meet me
downstairs
in 5. I called out and I'm already 'round here."
Surprised Traci was, she felt a chill in the air
Got her mental prepared for the shit she would hear
And then darkness... I ain't talking 'bout Charlie Murphy
But every single light in the community wasn't working
Elsewhere Professor Greenlove can't contact his mama
'Cause little did he know she had her own batch of
drama
Felt ill called 911 before she was a goner
Cut herself while collapsing she ain't made out of
armor see
Dee left the pharmacy he has no honor
Now mama Greenlove can't get the meds prescribed
by her doctor
(Meanwhile) Professor's driving and he's not seeing
proper
It was too dark to find his glasses in his freaking locker
Yall know that that's a hazard right blazing thru the
traffic light
That wasn't on at a glance he crashed into an
ambulance
Same one his mama's in when does the drama end
Fore' that Freeman told Traci she's carrying apart of
him
Dee's watching them hug and read a sheet while his
head twirl
He dipped out of the pharmacy to win back his ex-girl
Eternally stressed heard them mention a paternity test
Then he rushed Free. A cop came to come see
What the ruckus was about Dee reached for Free's
pocket
While reaching in his own for what might have been a
wallet
Then they heard a gun buss aloud now Dee's no mo
He used to beat on Traci. Kevin told her he was loco
So she broke up with the mofo and gave her freedom
to Freeman
'Cause Dee was a prisoner of his own inner demons
(Nearby) Professor flees his Lex to find his mom
But can't find her, for the medic served as a reminder
How her mama tortured her like this woman treated her

son
Felt obligated to rid the world of this person
All the while Kevin's crying over spilled milk
3 bodies on his block he's lucky he didn't get killed
Couldn't get through to the school so he stayed his ass
home
When he finally did he heard the date had been
postponed
So he took it as a sign wisely utilized his time
passed with flying colors now the brother's doing fine
Days later he stopped by the power plant to find
There's an opening Greenlove was forced to resign
Facing criminal charges while Kevin's working for me
And the fella's doing well and I trained him personally
Oh and by the way I'm way put the power on
Pay attention to the signs and see what's going on
