In the corner of your mind, the evil spirit hides

Waiting for a chance to show his face

It can come at any time in any color or design

Trying to entice the human race

Such a bad boy, won't stay in the yard

Skin tight girls can make it hard

I see U.V. TV

All this and more for free

Please don't hesitate

It may not be too late for you

If you start to break under all the weight

There's something you can do

Evil - temptations torture me

Evil - this whore of liberty

There's nothing wrong with breaking the rules

Pinstripe thugs are watching you

Uptown out on the street

All voices must be released

Evil - the curse of agony

Evil - angel of misery
