When I wake up  
I find you're here  
I should feel joy  
But I am not even near  
I don't know where  
You've been tonight  
I guess, you've been with someone else  
But I don't care if I'm right.  
I do not feel  
No jealousy  
If I would lose you now  
I'd simply say: "It's destiny!"  
I find you're here  
Moving on  
You're just doing what you want  
And I can't find it wrong  
I know for sure  
You would be gone  
You wouldn't stay with me  
If something better comes along  
I do not feel  
Anxiety  
I wouldn't be alone for long  
That's destiny!  
Ref.:  
When I wake up  
I find you're here  
I should feel joy  
But I am not even near  
I don't know where  
You've been tonight  
If I would lose you now  
I'd simply say: "It's destiny!"  
I cannot blame you  
For a thing  
If I would have the chance  
I'd do the same... to you!
