Shine like city lights burning bright
Learn to love what you hate by tonight
Take your time when you come home
No one is here for you
No one waits for you

Pray in Jesus name when you lose all your ways
Paint interstates on your skin, over veins
I will do my best to find you then
We can sing any song we want
Cause no one waits for us

Turn away from this place
Nothing here is worth fighting for
Look away Keep your eyes from this place
Please dont give away your pretty face
