Rick Hahn/George Thatcher)

Easy come and easy go

Hard to get a hold on

Searching for what you don't know

Blind to where you belong

Feel the power in your dreams

Vision in your sight

Nothing's dark as it may seem

We can make it right

CHORUS

I have faith

In your love

I have faith

In your heart

You don't need to hide from what you want

You've just got to give it all you got

The first thing that you need

You got to have faith

Truth hidden between the lies

We both know the chances

Nothing comes from compromise

Only strength advances

I will be here at your side

For everything you do

When the world tears at your pride

I'll be there for you

CHORUS

When the world's coming at you like a hungry alligator

You got to have faith

When you've got to pay them now or they'll take it from
you later

You got to have faith

When you feel like the future's hiding on a distant
cloud

You got to have faith

And you feel like shouting at the good Lord out loud

You got to have faith

CHORUS

When you know that you're ready but the time is not
right

You got to have faith

And you lie awake staring at the ceiling all night

You got to have faith
